#### EDUCATION

Texas A&M University

College Station, USA

2015 - 2021

Ph.D. in Computer Science Co-Advisors: Dr. Andruid Kerne and Dr. Ruihong Huang

Thesis: How to Support Situated Design Education through AI-Based Analytics

Texas A&M University

College Station, USA

2011-2014

M.S. in Computer Science Advisor: Dr. Andruid Kerne

Thesis: TweetBubble: A Twitter Extension Stimulates Exploratory Browsing

Delhi Technological University

Delhi, India

B.E. in Information Technology 2003–2007

#### INDUSTRY EXPERIENCE

#### Full-Time

Audigent
Research and Engineering, Data Analytics

New York, USA

 $Mar~2022{\rm -Present}$ 

- → Help drive executive strategy by contributing state-of-the-art solutions, conceptualizing and developing them in collaboration with stakeholders across business units.
- → Design, develop, and optimize large-scale data systems focused on deriving audience analytics and presenting them via dashboards.
- → Research, prototype, and recommend new techniques, including AI/ML approaches, for advancing derivation and optimization of audience segments.
- → Mentor junior engineers in designing and implementing automation, optimization, and analysis processes.

Amobee Research and Engineering, Data Analytics Los Angeles, USA

 $\operatorname{Jun}\ 2021\text{-}\mathrm{Mar}\ 2022$ 

- → Collaborated with stakeholders across business units to identify and disambiguate requirements, as well as to validate that the developed solutions meet or surpass the requirements.
- → Designed, developed, and optimized data pipelines that operate at petabytes scale and deliver ad insights for a range of platforms, including digital and linear media.
- → Investigated machine learning models to optimize data pipeline performance, following extraction of novel insights through exploratory data analysis.
- → Mentored junior engineers in developing and optimizing data pipelines for delivering diverse analytics.

Samsung Noida, India

Engineering and Commercialization, Media Platform

Jul 2007-Aug 2011

- → Played an instrumental role in the commercialization of Java platform for mobile, set-top, and blu-ray product lines, coordinating development across teams in India and S. Korea. Teams' size: 10 members each.
- → Developed, ported, and optimized 2D Graphics module of Java Virtual Machine.
- → Mentored junior engineers in implementing graphics rendering and optimizing multithreaded execution.
- → Developed a web-based software component quality evaluation system.
- $\rightarrow$  Developed notebook apps focused on remote access and network management.

#### Internship

#### Centrum Wiskunde & Informatica

Research and Engineering, Interactive Systems

Mentors: Dr. Pablo Cesar and Dr. Abdallah El Ali

→ Identified a research gap in supporting personal health tracker users in understanding their data.

- → Developed surveys to gather needs and evaluate visualizations for users' sensemaking of their sleep data.
- → Identified effective visualizations for sleep tracking through quantitative and qualitative data analyses.

Adobe Research San Jose, USA

Research and Engineering, Marketing Cloud

Mentor: Dr. Eunyee Koh

→ Identified a research problem in audience segmentation, engaging in discussions with marketing experts.

- → Developed interactive visualization of large-scale graph data to present audience overlaps across campaigns.
- → Established the system's efficacy through user studies followed by quantitative and qualitative data analyses.

Google Mountain View, USA

Engineering, Android Search

Mentor: Amos Yoffe

→ Developed module for presenting message results in Android In Apps search, clustered by topic and time.

- → Validated the new presentation method by creating a test dataset of messages and comparing search results.
- → Launched in September 2016, making the feature available worldwide.

Google Summer of Code

College Station, USA

Summer 2012

Summer 2017

Summer 2016

Engineering, Web Semantics

Host Organization: Interface Ecology Lab, Texas A&M University

- → Developed a RESTful service for meta-metadata structured web semantics represented in XML / JSON format.
- → Developed caching, database integration, logging, testing, and deployment modules.
- → Deployed the service in a production environment following a thorough investigation of available web servers.

# ACADEMIC RESEARCH PROJECTS

• Design Analytics [Human-Computer Interaction, Artificial Intelligence]

Spring 2017–Spring 2021

A human-centered AI investigation for assisting instructors in assessing a range of visual and conceptual characteristics present within student design work.

- → Engaged co-design discussions and workshops to understand instructors' situated practices and needs.
- → Developed an AI recognizer to measure students' use of space and scale in their free-form design work.
- → Deployed AI-based analytics via dashboards, as a technology probe, in situated course contexts.
- → Established efficacy through quantitative precision-recall measures and qualitative analysis of instructor interviews using a grounded theory approach.

• TweetBubble [Human-Computer Interaction]

 $Fall\ 2013\text{--}Fall\ 2016$ 

A Chrome Extension for Twitter users to follow @usernames, #hashtags associations without tabs or windows.

- → Developed and deployed Chrome Extension, making it available worldwide.
- → Conducted studies during societal events such as the Academy Awards and Super Bowl.
- → Developed ideation metrics of exploratory browsing, including Fluency, Flexibility, and Novelty.
- → Established efficacy through a mixed methods evaluation, including quantitative ideation metrics and qualitative analysis of user experience data using grounded theory.

• Event Indicators [Natural Language Processing]

Spring 2016–Fall 2016

A weakly supervised approach for extracting and clustering event indicators from Twitter social media.

- → Cleaned up event relevant tweets, filtering duplicates arising from exact matches, substrings, punctuations, etc.
- → Applied bootstrapping to acquire a variety of civil unrest event cues, starting from a single strong indicator.

Amsterdam, Netherlands Summer 2018 • BigSemantics [Software Engineering]

Fall 2012-Fall 2016

A software architecture for developing meta-metadata semantics powered dynamic exploratory browsing interfaces.

- → Developed new data models, extraction rules, and presentation semantics for social media.
- → Developed a RESTful service to facilitate semantics-driven application development across a range of contexts.
- EvolutionWorks [Human-Computer Interaction, Information Retrieval]

Fall 2011–Spring 2012

A free-form, zoomable space facilitating browsing, collection, and sensemaking of research papers interconnections.

- → Developed interface for presenting papers as cards within the free-form zoomable space.
- → Developed algorithm for determining representative terms present within a cluster when the user zooms out.
- → Established efficacy through user studies, comparing the interface with tabbed browsers.
- PhotoNav [Human-Computer Interaction]

Fall 2011–Spring 2012

A mixed reality investigation for assisting pedestrian navigation through the means of photographs.

- → Developed the NavCurator application for the specification of navigation paths over maps.
- → Evaluated handheld and head-mounted displays—through user studies—for assisting pedestrian navigation.

## SKILLS

- Programming Languages: C, C++, Java, Python, Scala, R
- Web Programming: HTML, JavaScript, React, REST, Django, Node.js
- Big Data Technologies: HDFS, Spark, Kafka, Druid, Airflow
- Machine Learning Libraries: Scikit-learn, TensorFlow, Keras
- Visualization Libraries: D3.js, Three.js, Gephi
- Research Methods: Interviews, Surveys, Observations, Workshops, Grounded Theory, Hypothesis Testing

## AWARDS & ACHIEVEMENTS

• Best Paper Nomination at ACM Document Engineering	2021
• Best Student Paper Nomination at ACM Document Engineering	2021
• Best Teaching Assistant Nomination, Dept. of Computer Science and Engineering, Texas A&M	2020-2021
• Student Travel Grant, College of Engineering, Texas A&M	2021
• Best Teaching Assistant Nomination, Dept. of Computer Science and Engineering, Texas A&M	2019-2020
• Best Teaching Assistant Nomination, Dept. of Computer Science and Engineering, Texas A&M	2018-2019
• Outstanding Reviewer Recognition for ACM CHI PLAY Full Papers	2019
• Academy for Future Faculty Certificate, Center for Teaching Excellence, Texas A&M	2018
• Student Travel Grant, College of Engineering, Texas A&M	2017
• Student Travel Grant, National Science Foundation	2017
• Best Paper Honorable Mention at ACM Creativity & Cognition	2015
• Student Travel Grant, College of Engineering, Texas A&M	2015
• Extra Mile Award at Samsung	2010
• Best Attitude Award at Samsung	2008
• Six Sigma Green Belt at Samsung	2008

## Refereed Conference Papers

- 1. Jain, A., Kerne, A., Lupfer, N., Britain, G., Perrine, A., Choe, Y., Keyser, J., and Huang, R. Recognizing Creative Visual Design: Multiscale Design Characteristics in Free-Form Web Curation Documents. In *Proceedings of the ACM Symposium on Document Engineering (DocEng) 2021*, 1-10 [33%]. Best Paper Nomination, Best Student Paper Nomination.

# MENTORING

- Gabriel Britain, Undergraduate Student in Computer Science, Texas A&M Fall 2019–Spring 2020

  Research: Design analytics dashboards and their integration with a multiscale design environment.
- Hannah Fowler, Undergraduate Student in Computer Science, Texas A&M Spring 2018–Fall 2018

  Research: A grounded theory analysis of design instructors' teaching and assessment practices and needs.
- Aaron Perrine, Undergraduate Student in Computer Science, Texas A&M Spring 2018–Fall 2018

  Research: Design analytics dashboards and their integration with a multiscale design environment.
- Alex Stacy, Undergraduate Student in Computer Science, Texas A&M Fall 2016

  Research: BigSemantics-based wrappers for extracting and presenting information from social media.
